We are Hiring TILER for International Deployment!

- Tile Installation: Perform wall and floor tile installations in accordance with design plans and project specifications.
- Surface Preparation: Prepare surfaces for tile installation by ensuring they are clean, smooth, and level. This may involve removing old tiles, patching surfaces, and applying appropriate adhesives.
- Tile Cutting: Measure, cut, and shape tiles to fit around obstacles, corners, and edges as necessary.
- Grouting and Finishing: Apply grout and other finishing materials to ensure a clean and polished appearance of installed tiles.
- Quality Assurance: Maintain a high standard of workmanship and quality control to ensure customer satisfaction.
- Adherence to Safety Standards: Follow safety protocols and guidelines to ensure a safe working environment at all times.
- Communication: Communicate effectively with project managers, designers, and other team members to coordinate and execute tiling projects efficiently.
- Problem Solving: Troubleshoot and address any issues or challenges that may arise during the installation process
